WORK EXPERIENCE

BP

Trading Summer Internship

London, UK

Jun 2026 – Jun 2026

- Modelled crude and gas supply-demand fundamentals to support short-term trading views.
- Priced and hedged commodity, rates and FX exposure alongside traders in live markets.
- Built macro scenarios with in-house economists to forecast commodity demand and price outlooks.
- Analysed group funding, liquidity and cash management processes across a global balance sheet.
- Assessed counterparty and credit risk exposure across trading and physical commodity deals.

Schonfeld Strategic Advisors

Spring Intern – Received Return Offer

London, UK

Mar 2026 – Apr 2026

- Built macro dashboards tracking commodity, producer and consumer price pressures across global markets during the heightened Middle East conflict and energy volatility.
- Synthesised live Bloomberg and Haver Analytics data into macro trend summaries for senior analysts and portfolio managers.
- Applied Python, regression testing and ARDL models to analyse inflation pass-through and price dynamics.
- Authored macro research reports and forecasts, directly supporting investment and portfolio decisions.
- Back tested links commodity, import, producer and consumer prices, creating interactive heatmaps ranked by Z-scores across the last 24 months to highlight inflation indicators.

St James's Place – Financial Adviser Academy

Work Experience Student

London, UK

Jul 2024

- Shadowed financial advisers to learn wealth management fundamentals and AI integration into advisory workflows.

Deutsche Bank

Market Risk Methodology Intern

London, UK

Aug 2023

- Analysed front-office risk frameworks including VaR, stress testing and derivatives pricing.
- Examined how risk modelling and trading desks interact, informing real-time trading decisions.

Liberty Specialty Markets

Summer Rotation Program

London, UK

Jul 2023

- Analysed internal financial strategy and capital flows within the FP&A department, supporting quarterly forecasting.

Mathnasium UK

Mathematics Tutor

London, UK

May 2023 - Dec 2024

- Tutored a roster of around 50 students, designing bespoke lessons to simplify technical material.

EXTRACURRICULARS

Automated Markets Morning Brief

Personal Project

London, UK

Jun 2026 – Present

- Built a daily Python pipeline (GitHub Actions) turning cross-asset data and central-bank feeds into an LLM-written morning note.

Independent Finance Projects

Independent Projects

London, UK

Sep 2025 – Present

- Volatility & Derivatives Toolkit: prices options live, builds implied-vol surfaces and models delta-hedged P&L scenarios.
- Portfolio Analysis Suite: cross-asset tool for portfolio construction, backtesting and stress-testing against 10 historical crises.
- Market Analysis Tools: six-tool global-markets platform spanning yield curve, FX carry, earnings and portfolio risk.
- Systematic Trading Framework: live multi-asset risk engine with vol targeting, a drawdown kill-switch, VaR and Sharpe.
- Trade Pitch Builder: structures trade pitches across nine asset classes, each with six fields - thesis, direction, entry, target, stop and R/R.

Model United Nations

Chair

London, UK

May 2024

- Chaired the Economic and Financial Committee (ECOFIN), one of 11 committees at Habs Model United Nations conferences for 400+ delegates.
